

CLEANING INSTRUCTIONS

Kal-Lite fiberglass cleans quickly with mild soap and water. Harsh abrasives are not required and will dull the finish. Do not use ammonia, aliphatic or aromatic hydrocarbon solvents.

A 5% to 10% trisodium phosphate water solution no warmer than 130°F (55°C) can be used. If trisodium phosphate is not available in your area, use a 5% to 10% solution of household automatic dishwasher detergent.

The embossed or smooth surface of Kal-Lite sheeting can best be cleaned with a sponge or soft brush. Apply the cleaner, working it across the surface in a scrubbing or circular motion. Rinse very thoroughly to remove all traces of trisodium phosphate.

NONWARRANTY - The facts stated and the suggestions made herein are based on our own research and/or the research of others and are believed to be accurate. No guaranty of their accuracy is made, however, and unless otherwise expressly provided in written contract, the products discussed are sold without conditions or warranties, expressed or implied. Purchasers should make their own tests to determine the suitability of such products for their particular purposes. Nothing contained herein shall be construed to be a recommendation to use or as a license to operate under or to infringe any existing patents.
